Install the Bionify plug-in on your web browser now!

Bionic Reading is a new method facilitating the reading process by guiding the eyes through text with artificial fixation points. As a result, the reader is only focusing on the highlighted initial letters and lets the brain center complete the word. In a digital world dominated by shallow forms of reading, Bionic Reading aims to encourage a more in-depth reading and understanding of writer content.

The graphic features a purple background with a large white text overlay on the left. On the right, there are two overlapping screenshots of a web application. The background screenshot shows a sidebar menu with 'Sales' selected and a main content area with a 'First Finance, Inc' account card. The foreground screenshot is a detailed view of 'Financial Services' with a star, share, copy, and expand button. It lists an expert 'Robert Anderson' and provides information about success in the industry, including use cases like 'Change management' and 'Technology adoption'. It also offers case studies, such as 'How Spekit drove digital adoption for Invesco', with a PDF icon and a date of '3 weeks ago'.

AI work (Artificial Intelligence) Home Record Listen Chat Report

Welcome to demo page of AI

Following is the detail:

- **Record:** User can speak the details of incidents by recording using microphone. These recordings are converted into text using a speech to text engine. The resultant text is saved in database and available for retrieval in form of reports.
- **Report:** This page shows details of the recorded incidents in form of a list.
- **Listen:** The web page starts recording audio spoken by user and the recorded Audio is converted to text which is made available for processing and retrieval through chat.
- **Chat:** The web page shows a textbox in which the user inputs question, after pressing Send button, the Server returns the response by searching data files of incidents recorded earlier (i.e. Using Record and Listen Options).

The system uses AI technologies such as Speech to Text, Text to Speech, Text Analysis, LLM Models, Intelligent response system etc.
